## Part I Writing

(30 minutes)

**Directions:** For this part, you are allowed 30 minutes to write a short essay based on the picture below. You should focus on **the impact of social networking websites on reading**. You are required to write at least 150 words but no more than 200 words.

**“I love reading. I read about 3 hours a day. My favorite book is Facebook\*.”**

\*Facebook is the name of a social networking website.

## Part II Listening Comprehension

(30 minutes)

### Section A

**Directions:** In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

### Conversation One

Questions 1 to 4 are based on the conversation you have just heard.

- A) He cooks dinner for the family occasionally.      B) He dines out from time to time with friends.  
C) He shares some of the household duties.      D) He often goes back home late for dinner.
- A) To take him to dinner.      B) To discuss an urgent problem.  
C) To talk about a budget plan.      D) To pass on an important message.
- A) Foreign investors are losing confidence in India's economy.  
B) Many multinational enterprises are withdrawing from India.  
C) There is a sharp increase in India's balance of payment deficit.  
D) There are wild fluctuations in the international money market.
- A) Approved.      B) Objected.  
C) Neutral.      D) Not mentioned.

## Conversation Two

Questions 5 to 8 are based on the conversation you have just heard.

5. A) They try to adapt to their changing roles.  
B) They form a more realistic picture of life.  
C) They may not be prepared for a lifelong relationship.  
D) They have unrealistic expectations about the other half.
6. A) He is lucky to be able to do what he loves.  
B) He is able to meet many interesting people.  
C) He is able to forget all the troubles in his life.  
D) He is lucky to have visited many exotic places.
7. A) It is stressful.            B) It is all glamor.            C) It is full of fun.            D) It is challenging.
8. A) Amazed.            B) Bothered.            C) Puzzled.            D) Excited.

### Section B

**Directions:** In this section, you will hear two passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

### Passage One

Questions 9 to 11 are based on the passage you have just heard.

9. A) Learn to be respectful in a hierarchical organization.  
B) Follow closely the fast development of technology.  
C) Learn new ways of relating and working together.  
D) Maintain the traditional organizational culture.
10. A) How the team is built to keep improving its performance.  
B) What type of personnel the team should be composed of.  
C) How the team integrates with what it is supposed to serve.  
D) What qualifications team members should be equipped with.
11. A) A team manager must set very clear and high objectives.  
B) Teams must consist of members from different cultures.  
C) Team members should be knowledgeable and creative.  
D) A team manager should develop a certain set of skills.

## Passage Two

Questions 12 to 15 are based on the passage you have just heard.

12. A) Word-of-mouth advertising.  
B) Distributing free trial products.  
C) Prestige advertising.  
D) Institutional advertising.
13. A) To sell a particular product.  
B) To attract high-end consumers.  
C) To promote a specific service.  
D) To build up their reputation.
14. A) By creating their own ads and commercials.  
B) By buying media space in leading newspapers.  
C) By hiring their own professional advertising staff.  
D) By using the services of large advertising agencies.
15. A) Conduct a large-scale survey on customer needs.  
B) Specify the objectives of the campaign in detail.  
C) Pre-test alternative ads or commercials in certain regions.  
D) Decide on what specific means of communication to employ.

## Section C

**Directions:** In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

## Recording One

Questions 16 to 19 are based on the recording you have just heard.

16. A) The personal computer.  
B) The Internet.  
C) The advanced filming technology.  
D) The broadband.
17. A) The creative industries in the UK are attracting creative talents from abroad.  
B) The creative industries are less competitive than the traditional industries.  
C) Those who plan to take up creative jobs should be determined and focused.  
D) Creative job holders always earn much more than those in other industries.
18. A) Inflexible.                      B) Enthusiastic.                      C) Responsible.                      D) Critical.

19. A) Because it will ruin the film-editing.  
B) Because they will be given only one opportunity.  
C) Because it will take them much time to correct the mistakes.  
D) Because it will violate their professional ethics.

## Recording Two

Questions 20 to 22 are based on the recording you have just heard.

20. A) It is a program allowing people to share information on the Web.  
B) It started off as a successful program but was unable to last long.  
C) It was mainly used by scientists and technical people to exchange text.  
D) It is a platform for sharing ideas or teaching at the University of Illinois.
21. A) He visited a number of famous computer scientists.  
B) He met with an entrepreneur named Jim Clark.  
C) He invested in a leading computer business.  
D) He sold a program developed by his friends.
22. A) They trusted his computer expertise.  
B) They had confidence in his new ideas.  
C) They were very keen on new technology.  
D) They believed in his business connections.

## Recording Three

Questions 23 to 25 are based on the recording you have just heard.

23. A) A young African schoolmaster.  
B) A young German schoolmaster.  
C) A young Asian schoolmaster.  
D) A young American schoolmaster.
24. A) Since the end of World War II.  
B) Since the end of World War I.  
C) Since the beginning of World War II.  
D) Since the beginning of World War I.
25. A) In the poor areas of Latin American, Africa, and Asia.  
B) In the rich countries of Europe.  
C) In the rich countries of America.  
D) All of the above.

## Part III Reading Comprehension

(40 minutes)

### Section A

**Directions:** In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

**Questions 26 to 35 are based on the following passage.**

It seems to be a law in the technology industry that leading companies eventually lose their positions, often quickly and brutally. Mobile phone champion Nokia, one of Europe's biggest technology success stories, was no 26, losing its market share in just a few years.

In 2007, Nokia accounted for more than 40% of mobile phone sales 27. But consumers' preferences were already 28 toward touch-screen smartphones. With the introduction of Apple's iPhone in the middle of that year, Nokia's market share 29 rapidly and revenue plunged. By the end of 2013, Nokia had sold its phone business to Microsoft.

What sealed Nokia's fate was a series of decisions made by Stephen Elop in his position as CEO, which he 30 in October 2010. Each day that Elop spent in charge of Nokia, the company's market value declined by \$23 million, making him, by the numbers, one of the worst CEOs in history.

But Elop was not the only person at 31. Nokia's board resisted change, making it impossible for the company to adapt to rapid shifts in the industry. Most 32, Jorma Ollila, who had led Nokia's transition from an industrial company to a technology giant, was too fascinated by the company's 33 success to recognize the change that was needed to sustain its competitiveness.

The company also embarked on a 34 cost-cutting program, which included the elimination of thousands of jobs. This contributed to the 35 of the company's once-spirited culture, which had motivated employees to take risks and make miracles. Good leaders left the company, taking Nokia's sense of vision and direction with them. Not surprisingly, much of Nokia's most valuable design and programming talent left as well.

- |             |                 |              |                  |              |
|-------------|-----------------|--------------|------------------|--------------|
| A) assumed  | B) bias         | C) desperate | D) deterioration | E) exception |
| F) fault    | G) incidentally | H) notably   | I) previous      | J) relayed   |
| K) shifting | L) shrank       | M) subtle    | N) transmitting  | O) worldwide |

## Section B

**Directions:** In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on **Answer Sheet 2**.

### First-Generation College-Goers: Unprepared and Behind

Kids who are the first in their families to brave the world of higher education come on campus with little academic know-how and are much more likely than their peers to drop out before graduation.

- A) When Nijay Williams entered college last fall as a first-generation student and Jamaican immigrant, he was academically unprepared for the rigors of higher education. Like many first-generation students, he enrolled in a medium-sized state university many of his high school peers were also attending, received a Pell Grant, and took out some small federal loans to cover other costs. Given the high price of room and board and the closeness of the school to his family, he chose to live at home and worked between 30 and 40 hours a week while taking a full class schedule.
- B) What Nijay didn't realize about his school — Tennessee State University — was its frighteningly low graduation rate: a mere 29 percent for its first-generation students. At the end of his first year, Nijay lost his Pell Grant of over \$5,000 after narrowly missing the 2.0 GPA cut-off, making it impossible for him to continue paying for school.
- C) Nijay represents a large and growing group of Americans: first-generation college students who enter school unprepared or behind. To make matters worse, these schools are ill-equipped to graduate these students — young adults who face specific challenges and obstacles. They typically carry financial burdens that outweigh those of their peers, are more likely to work while attending school, and often require significant academic *remediation* (补习).
- D) Matt Rubinoff directs I'm First, a nonprofit organization launched last October to reach out to this specific population of students. He hopes to distribute this information and help prospective college-goers find the best post-secondary fit. And while Rubinoff believes there are a good number of four-year schools that truly care about these students and set aside significant resources and programs for them, he says that number isn't high enough.
- E) "It's not only the selective and elite institutions that provide those opportunities for a small subset of this population," Rubinoff said, adding that a majority of first-generation undergraduates tend toward options such as online programs, two-year colleges, and commuter state schools. "Unfortunately, there tends to be a lack of information and support to help students think bigger and broader."
- F) Despite this problem, many students are still drawn to these institutions — and two-year schools in particular. As a former high school teacher, I saw students choose familiar, cheaper options year after year. Instead of skipping out on higher education altogether, they chose community colleges or state

schools with low bars for admittance.

- G) “They underestimate themselves when selecting a university,” said Dave Jarrat, a marketing executive for Inside Track, a for-profit organization that specializes in coaching low-income students and supporting colleges in order to help students thrive. “The reality of it is that a lot of low-income kids could be going to elite universities on a full ride scholarship and don’t even realize it.”
- H) “Many students are coming from a situation where no one around them has the experience of successfully completing higher education, so they are coming in questioning themselves and their college worthiness,” Jarrat continued. That helps explain why, as I’m First’s Rubinoff indicated, the schools to which these students end up resorting can end up being some of the poorest matches for them. The University of Tennessee in Knoxville offers one example of this dilemma. A flagship university in the South, the school graduates just 16 percent of its first-generation students, despite its overall graduation rate of 71 percent. Located only a few hours apart, the University of Tennessee and Tennessee State are worth comparing. Tennessee State’s overall graduation rate is a tiny 39 percent, but at least it has a smaller gap between the outcomes for first-generation students and those of their peers.
- I) Still, the University of Tennessee deserves credit for being transparent. Many large institutions keep this kind of data secret — or at least make it incredibly difficult to find. The University of North Carolina at Chapel Hill, for instance, admits only that the graduation rate for its first-generation pupils is “much lower” than the percentage of all students who graduate within four years (81 percent).
- J) It’s actually quite difficult to find reliable statistics on the issue for many schools. Higher education institutions are, under federal law, required to report graduation rates, but these reports typically only include Pell recipient numbers — not necessarily rates specific to first-generation students. Other initiatives fail to break down the data, too. Imagine how intimidating it can be for prospective students unfamiliar with the complexities of higher education to navigate this kind of information and then identify which schools are the best fit.
- K) It was this lack of information that prompted the launch of I’m First in 2013, originally as an arm of its umbrella organization, the Center For Student Opportunity. “If we can help to direct students to more of these types of campuses and help students to understand them to be realistic and accessible places, have them apply to these schools at greater frequency and ultimately get in and enroll, we’re going to raise the success rate,” Rubinoff said, citing a variety of colleges ranging from large state institutions to smaller private schools.
- L) Chelsea Jones, who now directs student programming at I’m First, was a first-generation college student at Howard. Like other students new to the intimidating higher-education world, she often struggled on her path to college. “There wasn’t really a college-bound culture at my high school,” she said. “I wanted to go to college but I didn’t really know the process.” Jones became involved with a college-access program through Princeton University in high school. Now, she attributes much of her

understanding of college to that: “But once I got to campus, it was a completely different ball game that no one really prepared me for.”

- M) She was fortunate, though. Howard, a well-regarded historically black college, had an array of resources for its first-generation students, including matching kids with counselors, connecting first-generation students to one another, and TRIO, a national program that supported 200 students on Howard’s campus. Still, Jones represents a small percentage of first-generation students who are able to gain entry into more elite universities, which are often known for robust financial aid packages and remarkably high graduation rates for first-generation students. (Harvard, for example, boasts a six-year graduation rate for underrepresented minority groups of 98 percent.)
- N) Christian Vazquez, a first-generation Yale graduate, is another exception, his success story setting him far apart from students such as Nijay. “There’s a lot of support at Yale, to an extent, after a while, there’s too much support,” he said, half-joking about the countless resources available at the school. Students are placed in small groups with counselors (trained seniors on campus); they have access to cultural and ethnic *affinity* (联系) groups, tutoring centers and also have a summer orientation specifically for first-generation students (the latter being one of the most common programs for students).
- O) “Our support structure was more like: ‘You are going to get through Yale; you are going to do well,’” he said, hinting at *mentors* (导师), staff, and professors who all provided significant support for students who lacked confidence about “belonging” at such a top institution.
36. Many first-generation college-goers have doubts about their abilities to get a college degree.
37. First-generation college students tend to have much heavier financial burdens than their peers.
38. The graduation rate of first-generation students at Nijay’s university was incredibly low.
39. Some top institutions like Yale seem to provide first-generation students with more support than they actually need.
40. On entering college, Nijay Williams had no idea how challenging college education was.
41. Many universities simply refuse to release their exact graduation rates for first-generation students.
42. According to a marketing executive, many students from low-income families don’t know they could have a chance of going to an elite university.
43. Some elite universities attach great importance to building up the first-generation students’ self-confidence.
44. I’m First distributes information to help first-generation college-goers find schools that are most suitable for them.
45. Elite universities tend to graduate first-generation students at a higher rate.

## Section C

**Directions:** There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

### Passage One

Questions 46 to 50 are based on the following passage.

Saying they can no longer ignore the rising prices of health care, some of the most influential medical groups in the nation are recommending that doctors weigh the costs, not just the effectiveness of treatments, as they make decisions about patient care.

The shift, little noticed outside the medical establishment but already controversial inside it, suggests that doctors are starting to redefine their roles, from being concerned exclusively about individual patients to exerting influence on how healthcare dollars are spent.

In practical terms, the new guidelines being developed could result in doctors choosing one drug over another for cost reasons or even deciding that a particular treatment — at the end of life, for example — is too expensive. In the extreme, some critics have said that making treatment decisions based on cost is a form of rationing.

Traditionally, guidelines have heavily influenced the practice of medicine, and the latest ones are expected to make doctors more conscious of the economic consequences of their decisions, even though there's no obligation to follow them. Medical society guidelines are also used by insurance companies to help determine *reimbursement* (报销) policies.

Some doctors see a potential conflict in trying to be both providers of patient care and financial overseers.

“There should be forces in society who should be concerned about the budget, but they shouldn't be functioning simultaneously as doctors,” said Dr. Martin Samuels at a Boston hospital. He said doctors risked losing the trust of patients if they told patients, “I'm not going to do what I think is best for you because I think it's bad for the healthcare budget in Massachusetts.”

Doctors can face some grim trade-offs. Studies have shown, for example, that two drugs are about equally effective in treating macular degeneration, an eye disease. But one costs \$50 a dose and the other close to \$2,000. Medicare could save hundreds of millions of dollars a year if everyone used the cheaper drug, Avastin, instead of the costlier one, Lucentis.

But the Food and Drug Administration has not approved Avastin for use in the eye, and using it rather than the alternative, Lucentis, might carry an additional, although slight, safety risk. Should doctors consider Medicare's budget in deciding what to use?

“I think *ethically* (在道德层面上) we are just worried about the patient in front of us and not trying to save money for the insurance industry or society as a whole,” said Dr. Donald Jensen.

Still, some analysts say that there's a role for doctors to play in cost analysis because not many others are doing so. "In some ways," said Dr. Daniel Sulmasy, "it represents a failure of wider society to take up the issue."

46. What do some most influential medical groups recommend doctors do?
- A) Reflect on the responsibilities they are supposed to take.
  - B) Pay more attention to the effectiveness of their treatments.
  - C) Take costs into account when making treatment decisions.
  - D) Readjust their practice in view of the cuts in health care.
47. What were doctors mainly concerned about in the past?
- A) Specific medicines to be used.
  - B) Effects of medical treatment.
  - C) Professional advancement.
  - D) Patients' trust.
48. What may the new guidelines being developed lead to?
- A) The redefining of doctors' roles.
  - B) Overuse of less effective medicines.
  - C) Conflicts between doctors and patients.
  - D) The prolonging of patients' suffering.
49. What risk do doctors see in their dual role as patient care providers and financial overseers?
- A) They may be involved in a conflict of interest.
  - B) They may be forced to divide their attention.
  - C) They may have to use less effective drugs.
  - D) They may lose the respect of patients.
50. What do some experts say about doctors' involvement in medical cost analysis?
- A) It may add to doctors' already heavy workloads.
  - B) It will help to save money for society as a whole.
  - C) It results from society's failure to tackle the problem.
  - D) It raises doctors' awareness of their social responsibilities.

## Passage Two

Questions 51 to 55 are based on the following passage.

Economic inequality is the "defining challenge of our time," President Barack Obama declared in a speech last month to the Center for American Progress. Inequality is dangerous, he argued, not merely because it doesn't look good to have a large gap between the rich and the poor, but because inequality itself destroys upward mobility, making it harder for the poor to escape from poverty. "Increased inequality and decreasing mobility pose a fundamental threat to the American Dream," he said.

Obama is only the most prominent public figure to declare inequality Public Enemy No. 1 and the greatest threat to reducing poverty in America. A number of prominent economists have also argued that it's harder for

the poor to climb the economic ladder today because the *rungs* (横档) in that ladder have grown farther apart.

For all the new attention devoted to the 1 percent, a new dataset from the Equality of Opportunity Project at Harvard and Berkeley suggests that, if we care about upward mobility overall, we're vastly exaggerating the dangers of the rich-poor gap. Inequality itself is not a particularly strong predictor of economic mobility, as sociologist Scott Winship noted in a recent article based on his analysis of this data.

So what factors, at the community level, do predict if poor children will move up the economic ladder as adults? What explains, for instance, why the Salt Lake City metro area is one of the 100 largest metropolitan areas most likely to lift the fortunes of the poor and the Atlanta metro area is one of the least likely?

Harvard economist Raj Chetty has pointed to economic and racial segregation, community density, the size of a community's middle class, the quality of schools, community religiosity, and family structure, which he calls the "single strongest correlate of upward mobility." Chetty finds that communities like Salt Lake City, with high levels of two-parent families and religiosity, are much more likely to see poor children get ahead than communities like Atlanta, with high levels of racial and economic segregation.

Chetty has not yet issued a comprehensive analysis of the relative predictive power of each of these factors. Based on my analyses of the data, of the factors that Chetty has highlighted, the following three seem to be most predictive of upward mobility in a given community:

1. *Per-capita* (人均) income growth
2. Prevalence of single mothers (where correlation is strong, but negative)
3. Per-capita local government spending

In other words, communities with high levels of per-capita income growth, high percentages of two-parent families, and high local government spending — which may stand for good schools — are the most likely to help poor children relive Horatio Alger's rags-to-riches story.

51. How does Obama view economic inequality?

- A) It is the biggest obstacle to social mobility.
- B) It is the greatest threat to social stability.
- C) It is the No. 1 enemy of income growth.
- D) It is the most malicious social evil of our time.

52. What do we learn about the inequality gap from Scott Winship's data analysis?

- A) It is fast widening across most parts of America.
- B) It is not a reliable indicator of economic mobility.
- C) It is not correctly interpreted.
- D) It is overwhelmingly ignored.

53. Compared with Atlanta, metropolitan Salt Lake City is said to \_\_\_\_\_.
- A) have placed religious beliefs above party politics
  - B) have bridged the gap between the rich and the poor
  - C) offer poor children more chances to climb the social ladder
  - D) suffer from higher levels of racial and economic segregation
54. What is strongly correlated with social mobility according to economist Raj Chetty?
- A) Family structure.
  - B) Racial equality.
  - C) School education.
  - D) Community density.
55. What does the author seem to suggest?
- A) It is important to increase the size of the middle class.
  - B) It is highly important to expand the metropolitan areas.
  - C) It is most imperative to focus our efforts on the elimination of income inequality.
  - D) It is better to start from the community to help poor children move up the social ladder.

## Part IV Translation

(30 minutes)

**Directions:** For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

在中国，父母总是竭力帮助孩子，甚至为孩子做重要决定，而不管孩子想要什么，因为他们相信这样做是为孩子好。结果，孩子的成长和教育往往屈从于父母的意愿。

如果父母决定为孩子报名参加一个课外班，以增加其被重点学校录取的机会，他们会坚持自己的决定，即使孩子根本不感兴趣。

然而在美国，父母很可能会尊重孩子的意见，并在决策时更注重他们的意见。

中国父母十分重视教育或许值得称赞。然而，他们应向美国父母学习在涉及教育时如何平衡父母与子女间的关系。

## Part III Reading Comprehension (40 minutes)

- 26. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 27. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 28. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 29. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 30. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
  
- 31. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 32. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 33. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 34. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
- 35. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O]
  
- 36. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 37. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 38. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 39. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 40. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
  
- 41. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 42. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 43. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 44. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
- 45. [A] [B] [C] [D] [E] [F] [G] [H] [I] [J] [K] [L] [M] [N] [O] [P] [Q] [R] [S]
  
- 46. [A] [B] [C] [D]
- 47. [A] [B] [C] [D]
- 48. [A] [B] [C] [D]
- 49. [A] [B] [C] [D]
- 50. [A] [B] [C] [D]
  
- 51. [A] [B] [C] [D]
- 52. [A] [B] [C] [D]
- 53. [A] [B] [C] [D]
- 54. [A] [B] [C] [D]
- 55. [A] [B] [C] [D]
